

Corporate Social Responsibility Statement

Protecting the environment is no longer a choice, it's an obligation that we collectively have. At the bellhop we're about ensuring a prosperous future for generations to come by making our staff and guests aware of the little things we can all do to make a difference.

With our core values we have our Corporate Social Responsibility embedded in the heart:

Cultural Equity

We value what individuals and their cultures bring to the table, celebrate differences and encourage social interaction. We create a work environment that is inclusive to people with all different kind of backgrounds.

Share

At the bellhop we invest in the strength and success of the local community by bringing neighbours together, encouraging innovation, and strengthen the vitality of the local communities. We utilize the hotel's façade, terrace, and empty walls for planting green, which has a positive effect on the air quality around us. We actively engage with local entrepreneurs to collectively improve the sustainability measures where we are located and provide an opportunity to local artists to display their artwork in our common areas.

Balance

We minimize the consumption of natural resources and optimize the use of the space we have. Our hotel is designed with sustainability in mind from the start: from investing in water- and energy saving systems to the use of highly sustainable resources like bamboo and cork for our furnishing. We ensure that our daily operations respects our planet's natural resource limit and lowers our footprint as much as possible; Among other things the hotel is fully gasless, we operate a paperless reception, we eliminate single use plastics and hotel amenities, and our cleaning products are all eco-friendly. Through our partnership with the Hotels for Trees Foundation, we contribute to a greener hotel world, in which one new tree is planted each time our guest chooses to skip the daily room cleaning. As a result of all these measurements, our hotel is preparing an independent third-party sustainability certification for our sustainable operations with partner Green Key.

In all choices we make for our business we make sure we make them responsibly by always considering our planet as well as our staff and guest's wellbeing. We take responsibility for the environmental and social impact of our business and go beyond the demands of local rules and regulations, while always balancing between people, planet and profit. We communicate about our CSR missions to our guests, staff and suppliers through different channels.

June 2023, Rotterdam
